Scientific Activities of the Government of Alberta

1987-88 Survey Results

A REPORT PREPARED BY:

**ROSE KRAKOWER
SCIENCE, TECHNOLOGY AND CAPITAL STOCK DIVISION
STATISTICS CANADA**

DECEMBER, 1988

FOREWORD

This report results from the fifteenth annual survey of scientific activities of the Government of Alberta conducted in June of 1988 by Rose Krakover of the Science, Technology and Capital Stock Division of Statistics Canada with the co-operation and assistance of Jan Speirs, Technology, Research and Telecommunications and Esther Giesinger of the Alberta Bureau of Statistics.

The first surveys of government scientific activities at the provincial level were conducted in the provinces of Ontario, Alberta and Nova Scotia in 1974; Saskatchewan was included in 1975, British Columbia in 1977. Nova Scotia dropped out of the survey in 1977 due to lack of science policy user groups within the province. In 1984 New Brunswick carried out its first survey, including only natural science activities. Manitoba joined in 1985 and Newfoundland in 1986. Nova Scotia renewed its participation in 1988. Reports for other provinces, similar to this one are available on request from the representatives identified at the end of this report.

Science surveys, like many other surveys, are based on the respondents' interpretation of definitions and methods of calculation. Accounting records, which use a science-based classification are rarely used. Notwithstanding that the data are estimates, they are a good representation of current science expenditures and manpower utilisation for the province.

Surveys of the scientific activities of provincial governments serve several purposes. They provide an essential data base for analysis and the formulation of provincial science policy. They also provide data for the development of a national aggregate and series. National aggregates are published by Statistics Canada in Science and Technology Indicators, (Catalogue No. 88-201) and Sources for Research and Development in Canada, (Catalogue No. 88-203). Many of the science publications are listed at the end of this report. The national aggregates are also needed to complete the international questionnaires for the Organisation for Economic Cooperation and Development (OECD) and the United Nations Education, Science and Culture Organisation (UNESCO).

This is the first year that person-years and associated costs devoted to the administration of extramural programs (AEP) are being shown separately. These data have in previous years been included with the intramural activities of the individual departments.

The 1987-88 survey has produced reasonable indicators of scientific involvement of the Alberta government at the department or agency level. This success is largely due to the goodwill and efforts of officials of the responding departments. The assistance provided by the Alberta Bureau of Statistics and Alberta Technology, Research and Telecommunications is gratefully acknowledged and appreciated by Statistics Canada.

HIGHLIGHTS

In the 1987-88 fiscal year the Government of Alberta spent \$243 million or 2.3% of total budgetary expenditures on science activities. While total government expenditures for 1988-89 are estimated to increase by 0.7%, scientific expenditures are expected to decrease by 6.5%. The major spenders are shown in Figure II.

Figure I Total Expenditures on Scientific Activities by Science Type, 1981-82 to 1988-89

1988-89e	158,716	35,272	193,988	1,572	31,515	33,087	160,288	66,787	227,075

Revisions to the historical data are due to the inclusion of the Roadway Planning Branch by Department of Transportation & Utilities.

Of the total 1987-88 science expenditures, amounting to \$243 million, 87% (\$212 million) was for activities in the natural sciences. Total research and development(R&D) expenditures accounted for 71% (\$173 million). The proportion of R&D expenditures to total science expenditures in the natural sciences was 80% (\$170 million) in contrast with 8% (\$3 million) in the social sciences.

The Department of Hospitals and Medical Care which prior to 1987-88 had administered the grants for Applied Heart Disease Research no longer includes these funds in their budget. The programs previously sponsored have stabilized and their expenditures, now considered as operating costs are included in the global budgets of their respective hospitals. Although the budget of the Department of Culture has not changed significantly from last year, there has been a shift away from science activities.

Figure II Total Expenditures on Scientific Activities by Major Department, 1986-87 and 1987-88

Major Department or agency	1986-87 (\$'000)	1987-88	Percentage change over 1986-87
Agriculture	17,153	17,626	2.8
Culture	19,598	7,433	-62.1
Environment	16,484	14,498	-12.0
Environmental Centre	11,712	11,076	-5.4
Alberta Heritage Foundation for Medical Research ...	56,930	51,167	-10.1
Hospitals and Medical Care	24,690	4,690	-81.0
AOSTRA	78,917	36,299	-54.0
Sub-total	225,484	142,789	-36.7
Other	107,943	100,122	-7.2
TOTAL	333,427	242,911	-27.1

Figure III shows that current R&D expenditures in the natural sciences were budgeted mainly by 3 departments or agencies. AOSTRA, which in 1986-87 accounted for 32% (\$79 million) of these funds, showed a decrease of over 54% in 1988-89.

Figure III Current Expenditures on R&D in the Natural Sciences, 1981-82 to 1988-89

(1) Prior to 1987-88 The Alberta Government provided financial assistance to the Alberta Research Council (ARC) under Vote 6. This was administered by the Executive Council. In 1986-87 the Department of Technology, Research and Telecommunications was formed and took over the administration of this transfer of funds to ARC.

In 1987-88, \$173 million was allocated to research and development. Slightly more than 65% of this amount was in support of the R&D activities performed in the industry and university sectors. The Departments of Agriculture, Forestry, Lands and Wildlife, Environment and the Environmental Centre were the major R&D performers.

The situation was reversed for related scientific activities (RSA) which was primarily an intramural activity. Approximately 82% of the RSA was performed by three government departments and agencies notably the Departments of Culture, Economic Development and Trade, and Transportation and Utilities.

TOTAL	79,541	50,688	69,535	730	33,085	9,332	242,911

(1) Includes only annual funding by the Government of Alberta - other funds are not included.

Of the \$31 million of provincial funds allocated to the industrial sector, \$44 million (87%) was devoted to R&D. AOSTRA, the major contributor to this sector, accounted for 34% (\$24 million) of these funds. AOSTRA, the Alberta Heritage Foundation for Medical Research and the Department of Technology, Research and Telecommunications are the main provincial funders of the university sector. Together they accounted for 89% of the \$70 million funded, of which \$68 million was devoted to R&D.

The Alberta Research Council received its funds from eleven provincial departments in 1987-88. The largest source was the Department of Technology, Research and Telecommunications for an amount of \$26 million.

1	58.0	0.5	17.0	24.5	100.0

(1) Includes Agricultural Research Trust.

The Alberta Heritage Savings Trust Fund is the source of 90% of AOSTRA's science expenditures. In total, the Fund is the source of 17% of the 1987-88 provincial science expenditures. Other sources include the Alberta/Canada Energy Resources Research Fund and the Alberta Heritage Foundation for Medical Research Endowment Fund.

TOTAL	242,911	100.0	227,075	100.0

The major applications of science expenditures are reflected in Figure VII. Over 60% of the Government's science expenditures were devoted to health issues and industrial and economic development. This trend will continue into 1988-89. The major departments or agencies supporting these applications are the Alberta Heritage Foundation for Medical Research, Technology, Research and Telecommunications and Agriculture.

As expected, social development is the focus of science activities in the social sciences. The Departments of Culture, Education, and Municipal Affairs are the main supporters.

Approximately 5% (1,755 person-years) of the provincial government labour force were engaged in scientific activities in 1987-88. Over 42% of these were found in the scientific and professional category. In the natural sciences, the technical category was the largest group involved in science and technology. Over \$163 million of extramural programs were administered by 129 PAs.

DEFINITIONS

This report covers those scientific and technological activities which involve the generation, dissemination and application of new scientific and technological knowledge. The central activity is research and experimental development (R&D). In addition, there are a number of related scientific activities (RSA) which are considered in less detail.

R&D is creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of humans, culture and society and the use of this stock of knowledge to devise new applications. It requires the acquisition of knowledge and not just information. New knowledge involves the integration of newly acquired information into existing hypotheses, the formulation and testing of new hypotheses or the re-evaluation of existing observations.

The major related scientific activities (RSA) are education support, technical surveys, statistical surveys, information services, special services and studies, and museum services. Education support, statistical surveys, and museum services are largely self-explanatory the other three are described below.

Technical surveys are activities directed towards the exploration and systematic description of the earth and its natural resources. The activities include the gathering, processing, collating and analysing of data on natural phenomena except when part of a research project or a museum service. The preparation of maps and survey reports, their printing and cataloguing, are also included.

Information services are activities directed to recording, classifying, translating, and disseminating scientific and technological information (Technology Transfer) as well as information resulting from R&D in the social sciences or required in support of such R&D. Included are the operating of scientific and technical libraries, specialised libraries and archives, the publication of scientific journals and bibliographies, and the organisation of scientific conferences. Grants for the publication of scholarly works are also included.

Special services and studies in the natural sciences are activities directed towards the establishment of national and provincial standards for materials, devices, products and processes; the calibration of secondary standards; non-routine quality testing; feasibility studies and demonstration projects. In the social sciences, special services and studies are systematic investigations carried out in order to provide information needed for planning or policy formulation, including feasibility studies, and demonstration projects.

Activities are either natural sciences or social sciences and humanities. Natural sciences consist of disciplines concerned with the understanding, exploring, developing or utilising the natural world. Included are the engineering, mathematical, environmental, life and physical sciences. Social sciences and humanities include all disciplines involving the study of human actions and conditions and the social, economic and institutional mechanisms affecting humans. Included are such disciplines as anthropology, business administration and commerce, communications, criminology, demography, economics, geography, history, languages, literature and linguistics, law, library science, communications, philosophy, political science, psychology, religious studies, social work, sociology and urban and regional studies.

Five performing sectors are identified besides the Alberta Research Council. Intramural refers to the provincial department or agency performing a scientific activity. Industry consists principally of private corporations but also includes crown corporations with a commercial function (e.g., power utilities) and industrial research institutes not controlled by another sector. Universities cover postsecondary educational institutions and affiliated teaching and research facilities. Hospitals and health organisations are health organisations such as the Heart Foundation and hospitals which do not belong to the university sector. Other includes non-resident performers of scientific activities funded by the provincial government, as well as recipients not covered elsewhere such as the Federal Government, other provincial departments and individuals.

Expenditures are either current or capital. Current expenditures include those costs for personnel, transportation and communications, information, professional and special services, rentals, purchased repair and upkeep, utilities, materials and supplies. Capital expenditures are those on the construction and acquisition of land, buildings, machinery and equipment. Total expenditures include current plus capital.

**RESPONDENTS
1987-88**

The following Departments are currently involved in scientific activities in the province of Alberta. The coordinator listed is the person responsible for the expenditures reported. We wish to thank the coordinators, as well as those who assisted in the amalgamation of data, for their time and efforts in providing us with these statistics.

Advanced Education

Coordinator: Asefa Gabregrgorgis (422-4845)

Research and Information Support is responsible for the collection and analysis of data for the development of long range plans and policies in the area of advanced education. The other major activity is the operation of the Innovative Projects grant program to support the development and demonstration of innovative instructional techniques. R&D grants are awarded to Researchers in Alberta universities and health organizations through the Alberta Foundation for Nursing Research. Special Purpose Grants are awarded to private non-profit foundations and research institutes to examine various aspects of public policy.

Agriculture Research Trust

Coordinator: Laraine Strafford (432-4931)

The Trust, funded by the provincial government and industry, supported R&D projects in many aspects of agricultural and food sciences (including rural economy). Projects were carried out mainly in Alberta universities. The Trust completed its mandate in July, 1987.

Agriculture

Coordinator: Dr. Ralph G. Christian (422-1072)

The Department operates a number of research centres in Alberta, as well as supporting agriculture related research projects undertaken by universities and provincial research organizations.

Alcoholism and Drug Abuse Commission

Coordinator: David Hewlett (427-4275)

The Commission carries out or funds studies required for program evaluation, policy analysis and needs assessments.

Attorney General

Coordinator: D. Ian Hope (427-4897)

The Department makes an annual research grant to the Institute of Law Research and Reform at the University of Alberta.

Career Development and Employment

Coordinator: Joe Hammond (427-8501)

The Labour Market Information and Planning Division is responsible for the provision of a wide range of planning, research, policy analysis and evaluation services which assist the Department in the development and implementation of its policies, programs and services throughout the Province.

Community and Occupational Health

Coordinator: Brian Thomas (427-6971)

The Occupational Health and Safety Heritage Grant Program, which is administered by the Research and Epidemiology Branch of the Occupational Health and Safety Division, supports applied research projects and the development of innovative educational programs aimed at the reduction of work-related injuries and illnesses. Other branches involved with scientific activities include Management Support Services, Mental Health Services and Laboratory Services.

**RESPONDENTS
1987-88**

Consumer and Corporate Affairs

Coordinator: David Thompson (427-6941)

The Corporate Planning and Consumer Education Divisions conduct program evaluations, policy analysis and needs assessments in support of departmental programs.

Culture

Coordinator: Mark Rasmussen (427-3182)

The social science activities were reported as a composite of Historic Site Service, Archaeological Survey, Provincial Archives, Reynolds-Alberta Museum, Historical Resources Division and Library. The natural sciences were reported by the Natural History Sector of the Provincial Museum and the Tyrell Museum of Palaeontology.

Economic Development and Trade

Coordinator: Terry Eliuk (427-0675)

Eight branches are involved in related scientific activities: Commissioner General for Trade and Tourism, Finance and Administration, Futures Compendium, Industry Development, Trade Development, Strategic Planning, Transportation Services and Small Business Development. The activities undertaken and funded were special services and studies and statistical studies to provide information for economic planning and policy formation.

Education

Coordinator: Mr. Gary Zetko (427-2991)

The Planning and Policy Secretariat is involved chiefly with issue-oriented research of a cross-sectional nature as well as studies and surveys.

ACCESS Educational Communications Corporation

Coordinator: Dr. M. Plumb (451-7272)

The Planning, Marketing and Program Research Branch carries out or funds related scientific activities.

Energy

Coordinator: Mr. R.D. McDonald (427-8042)

The Scientific and Engineering Services and Research Division supports a large volume of R&D activity, funded mainly through the Alberta/Canada Energy Resources Research Fund. Projects relate to furthering the development and use of energy resources with emphasis on coal, renewables and energy conservation.

Environment

Coordinator: Sharon Quinn (632-6761)

Most of the activity is in the Natural Sciences with ten programs reporting: Research Management, Planning, Environmental Assessment, Earth Sciences, Reclamation Research Technical Advisory Committee, Operations, Pollution Control, Air Quality Control, Water Quality Control, and the Survey Branch. A small amount of activity in the social sciences is reported by the Planning and Environmental Assessment divisions. A recent reorganization of the Department has resulted in an incomplete picture of purposed science activities for 1988-89.

Alberta Environmental Centre

Coordinator: Dr. R.S. Weaver (632-6761)

The Centre is an inter-disciplinary research and service agency which studies and solves environmental problems identified by departments and agencies of the Government of Alberta.

RESPONDENTS - Continued

Environment Council of Alberta

Coordinator: Mr. A. Giacomazzi (427-5792)
The Council offers support through library services and panels. It prepares reports and recommendations and provides information for various public hearings and policy formulating projects.

Forestry, Lands and Wildlife

Coordinator: Mr. M. Brownlee (962-8700)
Scientific expenditures were reported by five divisions: Alberta Forest Service, Fish and Wildlife Division, Public Lands Division, Forest Industry and Development Division and the Alberta Land Information Services Division.

Alberta Heritage Foundation for Medical Research

Coordinator: A.J. Mykolyn (423-5727)
The Foundation, supported by an endowment fund, supports medical research based in Alberta.

Hospitals and Medical Care

Coordinator: Dr. T.M. Cheung (427-1420)
The Heritage Trust fund supports cancer research performed by hospitals and health organizations and universities. Prior to 1987-88, grants for Applied Heart Disease Research had been administered by this department. These funds are now included in the global budgets of the respective hospitals. For this reason there has been a significant decrease in extramural payments for science activities in the natural sciences.

The social science activities, funded from the departmental budget, include health care programs, hospital planning and related studies. The branches reporting scientific activities include Health Economics and Statistics Branch, Hospital Services Branch, Systems Consulting Services Branch, and Research and Strategic Planning Branch.

Labour

Coordinator: Janet E. Howell (427-8531)
Wages and benefits as well as other labour information is studied and analyzed. The results are made available for policy planning as well as the development of safety standards.

Alberta Mental Health Research Fund

Coordinator: Dr. R.J. Dyck (427-2813)
The Fund awards grants and contributions to Universities for health related research and development in both natural and social sciences.

Municipal Affairs

Coordinator: Linden Holmen (427-8150)
The Research and Development Branch manages the Innovative Housing Grant Program (I.H.G.P.) which provides grants to industry, institutions and individuals to carry out research pertaining to housing.

Alberta Oil Sands Technology and Research Authority

Coordinator: Mr. W.G. Kowaluk (427-7623)
Alberta Heritage Trust is the primary source of funds for AOSTRA which awards numerous contracts for research and development. The industrial sector receives the majority of the money with universities and the Alberta Research Council getting the remainder.

RESPONDENTS - Concluded

Recreation and Parks

Coordinator: Mike Boyd (422-1730)

The major objective reported by this Department for both the natural and social sciences is development in the area of culture, sport and recreation.

Social Services

Coordinator: Barbara Peterson (441-6752)

The projects mainly include systematic investigations in order to provide information for planning and policy formulation on human resources, child welfare and services to the handicapped.

Solicitor General

Coordinator: Joe Wong (427-0734)

The Computer and Research Services Branch develops information systems and conducts research in criminal justice.

Technology, Research and Telecommunications

Coordinator: Jan Speirs (422-0561)

The department provides financial assistance in support of research and development (R&D) to the university and industrial sectors. It is the main source of provincial funding for the Alberta Research Council. Other activities include the transfer and commercialisation of new technology.

Tourism

Coordinator: Janice Friesen (427-4837)

The projects involve evaluations, studies and surveys on tourism. These related scientific activities are carried out by both departmental personnel as well as those working in the industrial sector.

Transportation & Utilities

Coordinator: Alan Mah (422-2750)

Most of the activity is in natural sciences with eight programs reporting. These include Research and Development, Materials Engineering Branch, Bridge Engineering Branch, Business and Statistical Analysis Branch, Corporate Planning Services, Roadway Planning Branch and Regional Transportation Services. Only Urban Transportation Branch reports some related scientific activities in the social sciences. This is due to the technical and engineering aspects of the work relating to transportation.

Alberta Treasury

Coordinator: G. Jones (427-3058)

The Alberta Bureau of Statistics collects, compiles, analyses, abstracts and publishes statistical information relative to the commercial, industrial, financial, social, economic and general activities and conditions of the province.

Provincial Coordinators

Eight provincial governments sponsored the Science and Technology Statistics section in the collection of similar scientific activity data. Below is a list of co-ordinators for the various sponsoring departments/ministries.

Mr. J. Chandra
Co-ordinator - Science and Technology
Science and Technology Secretariat
Department of Commerce and Technology
P.O. Box 6000
Fredericton, New Brunswick
E3B 5M1 Tel.: (506) 453-2489

Ms. J. Orendorff
Technology Policy Branch
Ministry of Industry, Trade and Technology
Hearst Block, 900 Bay Street
Queen's Park
Toronto, Ontario
M7A 2E1 Tel.: (416) 963-1373

Mr. B. Hinder
Science Policy Advisor
Saskatchewan Science and Technology
2nd Fl. East, SEDCO Centre
15 Innovation Blvd., Innovation Place
Saskatoon, Saskatchewan
S7N 2X8 Tel.: (306) 933-7200

Dr. R. Mumble
Senior Policy Advisor
Manitoba Industry, Trade and Technology
214-155 Carlton Street
Winnipeg, Manitoba
R3C 3M8 Tel.: (204) 945-0127

Mr. P. Doherty
Director, Statistical Services Branch
Department of Industry, Trade and Technology
P.O. Box 519, 1800 Argyle Street
Halifax, Nova Scotia
B3J 2N7 Tel.: (902) 424-5691

Dr. P. Moden
Director, Research and Statistics
Department of Technology, Research and Telecommunications
11th Floor, Pacific Plaza
10909 Jasper Avenue
Edmonton, Alberta
T5J 3M8 Tel.: (403) 422-0567

Mr. T.A. Prentice
Manager, Science and Technology Division
Ministry of Advanced Education & Job Training
818 Broughton Street
Victoria, British Columbia
V8V 1X4 Tel.: (604) 387-2034

Mr. R. Ladrew
Development Officer
Technical Services Division
Department of Development and Tourism
P.O. Box 4750,
St. John's, Newfoundland
A1C 5T7 Tel.: (709) 576-5662

Statistics for the province of Quebec are provided by:

M.B. Girard
Responsable des A.S.T.
Ministère de l'Enseignement supérieur, de la
Science et de la Technologie
875 Grand-Allée
Edifice "H", 2e étage
Québec, Québec
G1R 4Y8 Tel.: (418) 643-3008

The Science and Technology Statistics Program is one of the major responsibilities of the Science, Technology and Capital Stock Division. The basic mission of the section is to assure the availability of pertinent statistical information in support of the development of science and technology in Canada.

Activities of the Section are described in an annual report distributed free of charge entitled *Publications of the Science and Technology Statistics Program*. This report is published in December each year.

Information is disseminated in a series of reports including monthly service bulletins, occasional background papers and annual reports which are described below.

Catalogued

- 88-001 Science Statistics (monthly)
- 88-201 Science and Technology Indicators, 1987 (annual)
- 88-202 Industrial Research and Development Statistics, 1986 (annual)
- 88-203 Resources for Research and Development in Canada, 1985 (out of print)
- 88-204 Federal Scientific Activities, 1988-89 (annual)
- 88-205C Directory of Industrial Research and Development Facilities in Canada, 1986 (out of print)
- 88-206C Directory of Federal Government Scientific and Technological Establishments, 1987 (annual)
- 88-501E An Indicator of Excellence in Canadian Science (occasional)
- 88-502E International Payments and Receipts for Technology (occasional)
- 88-503E Technology and Commodity Trade (occasional)
- 88-504E Patents as Indicators of Innovation (occasional)
- 88-505E Industrial Productivity and Research and Development Indicators (occasional)
- 88-506E A Framework for Measuring Research and Development Expenditures in Canada (occasional)
- 88-507E An Indicator of Excellence in Canadian Science: Summary Report (occasional)
- 88-508 Human Resources for Science and Technology (occasional)
- 88-509 Price Indexes for Canadian Industrial Research and Development Expenditures (occasional)

Working Papers

- Scientific and Technological Activities of Provincial Governments, 1979-80 to 1987-88
- Estimates of Canadian Research and Development Expenditures, by Region, 1979-1986
- Estimation of Research and Development Expenditures in the Higher Education Sector, 1986-87
- Federal Government Expenditures on Activities in the Natural Sciences and Engineering, 1963-64 to 1988-89
- Federal Government Expenditures on Activities in the Social Sciences and Humanities, 1970-71 to 1988-89
- Federal Personnel Engaged in Scientific Activities, 1970-71 to 1988-89
- Federal Government Science Expenditures by Region, 1981-82 to 1986-87
